# **Chapter 1 – Introduction**

#### **1.1 Product Overview**

The H-SPARTAN-4 has 4 channels of HDMI/CVBS inputs for Mpeg4 AVC/H.264 video encoding and Mpeg1 L2 and AAC audio encoding. Especially it is also allowed to play TS files through USB connector. It can be up to 1080/60P full HD resolution and very stable working on local networks.

#### **1.2 Key features**

- TS files play directly
- Low Latency & Low bit rate
- CBR/VBR control mode
- LCD & Web controlled, updated via Web
- UDP/RTP (Unicast/Multicast), HLS, RTMP, HTTP
- Youtube and Facebook Live Streaming

# **1.3 Specifications**

Interfaces	
Input	4 x HDMI, 4 x CVBS, 1 x USB
Output	1 x RJ45, 1Gbps IP Streaming, Protocols: UDP/RTP(Unicast/Multicast)/HLS, RTMP, HTTP
Control	LCD with 6 keys & 1 x RJ45 (Web NMS)
Video Encoding	
Format	H.264 AVC/HP@L4.0
Resolution	Input: 1080 50/60p, 1080 50/60i, 720 50/60p, 480i, 576i Output: up to 1080 30p
Bitrate	HDMI: 2~14Mbps CVBS: 2~6Mbps
Rate Control	CBR/VBR
Chroma Sample	4:2:0, 4:2:2
GOP Structure	IBBP
Audio Encoding	
Format	AC3, Mpeg1L2, AAC
Bitrate	64 ~ 384Kbps
Sample Rate	44.1KHz, 48.0KHz
General	
Power Supply	AC 100~240V 50/60Hz
Display	LCD panel @ 2 x 16 characters LED X5 (Ch1~4+USB)
Dimension	483 x 257 x 44.4mm
Weight	2000g
Environmental for operating	Temperature: 5°C- 40°C Relative Humidity: 80% @ 30°C

# **Chapter 3 - WEB Operation**

For setting up configurations you can use the front panel; or you can control and set the configurations from any computer by connecting the device to the RJ45 NMS Port. You should ensure that the computer's IP address is different from the Modulator IP address; otherwise, it would cause an IP conflict.

## <u> 3.1 Login</u>

The default IP of this device is 192.168.0.188. We can modify the IP through the front panel. Connect the PC and the device with net cable, and use ping command to confirm they are on the same network segment.

E.G. the PC IP address is 192.168.0.190, we then change the device IP to 192.168.0.xxx (xxx can be 0 to 255 except 190 to avoid IP conflict). Use any web browser to connect the device with the PC by inputting the Encoder & Modulator's IP address in the browser's address bar and press Enter. It will display the Login interface. Input the Username and Password (Both the default Username and Password are "admin".) and then click "LOGIN" to start the device setting. Both fields of Username and Password are case sensitive.

## 3.2 NMS Home Page& Status

Contents of the home page includes: Status/Encoder Setup /Streaming Setup/Network/ Password/Firmware/Configuration.

And device's status details are also shown on this page. Here you can see the MAC Address, Serial Number, Firmware version, USB Status, Uboot Version, Streaming, Stream information, USB information, HLS information.
